1. The scope of this document is to provide instructions for water revenue metering installed at the University of Missouri.
 2. As these meters will be used to measure building water usage for utility billing purposes, the meter shall be carefully sized considering the projected building utilization, number of fixtures and fixture flow quantities, process equipment, usage diversification and meter pressure loss. All capacities and selections must be approved by system ow-2 (e)4 t2 (t)-12 (e) 3.7
1.3.6. Meter shall include a fourth, grounding electrode at the 5 o'clock position.
